

NEW: INSPEC-5

The compact multifunctional desk top station for document verification with digital camera and document magnifier

for easy document examination at

- immigration check points
- airports
- banks
- police departments
- currency exchange offices

INSPEC-5

System specification:

- Basic instrument in modern design (desk-top model) with holder for bag
- Magnifier 10x with bag
- Exit for connection of Canon Powershot cameras G7-G12
- 8 integrated illumination systems:

Visible transmitted light (LED):

for identification of water marks, mechanical erasures, safeguarding threads, etc.

UV 365 / 313 / 254 nm surface light:

Fluorescent lamps 2x6W and 1x6W each, with safety features for UV 254/313 nm, for identification of authenticity of paper, chemical erasures, fibres and security marks

Incident white light (LED):

for printing techniques, OVD, OVI verification

Flat surface light / side light (LED):

5W LED with condenser for identification of mechanical erasures, embossed stamps, exchange of photographs, etc.

External flash light (LED):

flexible verification of ID documents in side light or transmitted light, strong light output, flexible hand-held light source

Vertical surface light (Retro) (LED):

identical light source as described before, but with deflection mirror (RETRO mirror), for identification of retro-reflective security marks

OPTIONS:

- Digital camera Canon Powershot G12 with objective adapter for connection to Inspec-5
- Carrying case for basic system
- DC/AC converter 12V

UV 254nm

UV 313nm

UV 365nm

White Light

Transmitted light

Surface/side Light

Dimensions: 336x260x305 mm (wx dxh)
Weight: 7 kg
Input power: 85-265VAC/50-60 Hz
Power consumption: ~ 20W
Operation conditions: 5 - 40°C

Document magnifier with bag:

- magnification 10x
- integrated illumination with surface and side light
