

## **RETRO-CHECK COMPACT with magnifier** **Item No. 026005.**

---

Retro-Check is compact, easy to operate and specially designed for checking the genuineness of identity document such as: passports, tourist cards, ID cards, drivers licences, etc. In addition this device is excellently equipped for checking banknotes, cheques, bank cards and credit cards.

### Checking features:

Retro-reflective laminates (3M Confirm™), watermarks and see-through registers, dry embossing and latent images (intaglio or plate printing), fluorescent marks like fibres and fluorescent ink patterns.

Retro-Check is very user-friendly:

- Retro-reflective laminates are checked by looking through the viewer, with the "mirror" reflecting the light towards the document, held or placed behind it.
- Watermarks and see-through registers are checked by holding the document in front of the viewer and letting the light shine through a page
- for dry embossing and latent images, the document is held in line with the viewer and thus letting the light skim the page.
- Fluorescence is checked by placing the document under the UV lamp at the rear. By turning the white light away from the document, fluorescence becomes clearly visible. One does not have to look through the viewer for UV checks.
- UV lamp is placed up front, under the viewer. This UV lamp has a screen for better efficiency. It is equipped with a revolving magnifier to check micro print

## Technical data

Base: \_\_\_\_\_ 2mm thick steel  
Viewer: \_\_\_\_\_ moulded ABS  
Colour: \_\_\_\_\_ black  
Finishing: \_\_\_\_\_ structured lacquer  
Lamps: \_\_\_\_\_ 20W Halogen with spot filter, 9W black-light blue PL  
Power consumption: \_\_\_\_\_ 220-230V AC, 50 Hz (110-115V upon request)  
Fuse: \_\_\_\_\_ 250V, 1AT  
Dimensions (hxwx): \_\_\_\_\_ approx. 27x23x27 cm  
Weight: \_\_\_\_\_ approx. 5 kg
